

ORGANIC EXFOLIATING SOAP BAR

Our NEW Organic Soap products are a notch above our regular soap bars in that they have all the same great benefits except they are even better. Made with all organic oils, our handcrafted organic soaps are made the old fashioned way with the cold saponification process. No animal fat or by-products are used in our process. Instead we use organic oils of palm, coconut and olive producing a great creamy lather.

We invite you to try our soaps and take the lather challenge – our soaps provide gentle exfoliation and a nice astringent feel to the skin through the use of our unique ingredient of organic Yerba Maté. High concentrations of organic Aloe Vera then rejuvenate the exfoliated skin and assist in moisture retention.

We retain the glycerin so Lather Up!

DISTILLED WATER: Water that has been boiled into steam and then re-condensed into liquid. This process removes impurities, especially heavy metals, and allows the final soap and glycerin to be virtually free of contaminants.

SAPONIFIED OILS OF ORGANIC PALM, OLIVE AND COCONUT OIL WITH RETAINED GLYCERIN: These organic vegetable oils are saponified by mixing them with sodium hydroxide, which produces soap and glycerin. The saponification process retains the glycerin to the highest levels, allowing for a rich lathering, moisturizing all organic and natural soap.

ORGANIC ALOE VERA EXTRACT: We use only certified organic Aloe Vera extract sourced by the world's oldest and largest manufacturer and grower of Aloe Vera from a farm in the Dominican Republic. Aloe has been used for centuries as a rejuvenator of cells and adds cool, soothing properties to the skin.

ORGANIC YERBA MATÉ EXTRACT: We are the first company in the United States to utilize this Southern Brazil nutrient rich tree leaf extract in a complete line of personal care products. This certified organic extract has skin strengthening properties and is rich in vitamins, minerals and antioxidants.

ORGANIC YERBA MATÉ LEAF: Certified organic leaf that is matted to provide exfoliating and invigorating properties to the skin.

PURE ESSENTIAL OILS: We use carefully selected pure natural essential oils to provide our pleasantly fresh and unique aromas, as fresh and unique as the rainforest we preserve. And now we also have a new scent called "Pure Mist" which is naturally light and unscented for the complete purist in some of you.

NATURAL COLORANT: We color our soap green to match our mission using a plant based stabilized chlorophyll mixed with sunflower oil.
